

*Gen 7 – 12R2 Equipment Package*

*Gen 7 – 12R2 Basic Model Design Sample*

*Gen 7 – 12R2 Custom Retail Design Sample*

### Description

The Gen7 - 12R2 was designed carefully with a few key attributes in mind for inclusion on a variety of customizable projects. The single return air tower format allows for both showcasing of the tunnel at a great angle as well as fitting within more narrow floor plans. We learned from models in Denver and San Francisco that enthusiasts and pro flyers that practice in a 12 foot tunnel gravitate towards an extended flight chamber and we've thus enhanced the flying area below the diffuser with a more spacious column of air.

### Options

- Extended Glass

### Specifications

<b>Tunnel Diameter</b>	3.7 m   12.0 ft
<b>Flying Height</b>	14.1 m   46.3 ft
<b>Building Length</b>	22.4 m   73.5 ft
<b>Building Width</b>	11.8 m   38.7 ft
<b>Building Height</b>	15.0 m   49.2 ft
<b>Max Air Speed</b>	263.13 km/hr   163.5 mph
<b>Average Power</b>	325 kW/hr
<b>Max Number of Flyers</b>	6 flying / 8 static
