

Gen X - 12R4

Gen X - 12R4

Gen X - 12R4

Description

The Generation X is the newest iFLY design, poised to rapidly change the face of the experiential entertainment industry.

Gen X will deliver an enhanced flight experience while focusing on creating a “show” for both passing pedestrians and customers inside the facility. It can be approved as a “ride” or a temporary structure, allowing for more flexible, shorter term land leases.

This model can be erected in 6-8 weeks, dramatically reducing the time to opening vs. other wind tunnels. It is significantly less expensive to erect than other models, and can be moved.

Specifications

Tunnel Diameter	3.7 m 12 ft
Flying Height	13.5 m 44.3 ft
Building Length	26.9 m 88.3 ft
Building Width	18.6 m 61.0 ft
Building Height	18.5 m 60.7 ft
Max Air Speed	263.1 km/hr 163.5 mph
Average Power	393 kw/hr
Max Number of Flyers	6 flying / 8 static
