

*Gen 9- 10.5-Recirculating Equipment Package*

### Description

Smaller markets and special situations demand innovation. The Gen M models open new markets in the most economical way, providing the best ROI opportunities.

Our 10.5 Recirculating model enjoys a 10.5-foot (3.2m) flight chamber cross section using our new design. With best-in-class dual return flow path and industry-leading aerodynamic performance, the 10.5 Recirculating tunnel will satisfy both beginner and advanced fliers.

*Gen 9 - 10.5-Recirculating Custom Retail Concept*

### Specifications
