

Model 14R4 Equipment Package

Model 14R4 Equipment Phase

Model 14R4 Retail Concept

## Description

Our pro model range starts with the model 14R4. Our 14-foot wind tunnel diameter size is the most popular and represents almost 50% of our facilities across the globe. Our ninth generation tunnel uses our new modular design, which offers much quicker and less expensive build times and can be ideal for long term leases or land purchases that attract entertainment, sport, and military users.

## Options

- Extended glass
- Single or multi floor design options
